Erardo Aldana Pessoa

Computer Engineer (Distinction) · Full-Stack Developer · Open to Full-Time EU

Profile

Computer Engineer from the University of Alicante with Final Degree Project graded 10/10 with Distinction (Matrícula de Honor), defended on June 11th, 2026. Full-Stack developer working with Python/FastAPI on backend, React/TypeScript on frontend and PostgreSQL (including PostGIS). I bring more than 1.5 years of professional experience across corporate IT consulting at NTT Data, industrial automation with machine vision (LabVIEW) and real academic projects with code in production. My goal is to join a product team Full-Time where I can contribute from day one and keep scaling toward cloud architecture. Open to relocation within the EU.

Professional Experience

► **NTT Data** Nov 2025 — Feb 2026 · 4 months

IT Intern — Consulting / Public sector

Onboarding program at one of the world's largest IT consulting firms. Internal bootcamp on Appian (enterprise low-code platform) and onboarding on a project for ENAIRE (the Spanish air-traffic management authority). First contact with corporate consulting methodology and dynamics.

Appian · Low-code · IT consulting · Public sector

► **Autis Ingenieros** Feb 2020 — Jun 2021 · 10 months (2 periods)

Developer intern — Industrial engineering

Two vocational internships at a company specialized in industrial automation and machine vision. In-depth learning of LabVIEW and contribution to a camera-based inspection project to detect paint defects on automotive parts: image capture, image processing and decision rules running on the production line.

LabVIEW · Machine vision · Industrial automation · Automotive · Inline QA

► **App Informática** Feb 2018 — Jun 2018 · 5 months

Technician intern — Support and systems

First formal contact with the IT sector as a technician during the SMR vocational internship. User-facing technical support, configuration of home networks and equipment maintenance for end clients.

Networking · Hardware · Technical support

Education

• **Bachelor's in Computer Engineering** Graduated Jun 2026 · Final Project 10/10 with Distinction

University of Alicante

Comprehensive training in programming, algorithms, databases, software engineering, systems architecture and artificial intelligence. Final Degree Project defended on June 11th, 2026 with the highest grade and distinction.

• **Higher Degree in Multiplatform App Development (DAM)** Completed

Vocational Training

Java, Kotlin, Dart, native Android development, agile methodologies, OOP and databases.

• **Higher Degree in Web App Development (DAW)** Completed

Vocational Training

HTML, CSS, JavaScript, PHP, Laravel, MySQL. Full-stack web development and database management.

• **Mid-level Degree in Microcomputer Systems & Networks (SMR)** Completed

Vocational Training

System administration, networks, IT security, hardware and support.

• **Cambridge English B2 (FCE)** Obtained

Cambridge Assessment English

Official B2 English certification.

Featured Projects

► **EcoAlerta — Final Degree Project 2026 (10/10 Distinction)** [Defended]

github.com/eap59-ua/tfg-medioambiente-ua

React 18 · Node.js · PostgreSQL + PostGIS · Docker · JWT · PWA · Playwright

PWA platform to report and track environmental incidents. Final Degree Project with GIS spatial search, three user roles, admin panel and comprehensive testing. Defended with Distinction on June 11th, 2026.

► **Hydrofulness — AMAEM Hackathon 2026** *[Delivered]*

github.com/eap59-ua/hackathon-aguas-de-alicante-hydrofulness

FastAPI · React + Vite · TypeScript · scikit-learn · Docker

Water-intelligence system for Aguas Municipalizadas de Alicante. Anomaly detection with Isolation Forest, real-data ETL and neighborhood-level water-stress prediction.

► **Food Donation Network — GCS 2026** *[Delivered]*

github.com/eap59-ua/food-donation-backend

FastAPI · Async PostgreSQL · SQLAlchemy 2.0 · JWT · Docker

Backend connecting donors with receivers (NGOs, food banks) to reduce food waste. Hexagonal architecture with separate Domain, Application, Infrastructure and Presentation layers.

► **StudySync — Personal project 2026** *[In progress]*

github.com/eap59-ua/studysync

FastAPI · React · PostgreSQL · Redis · LiveKit · WebSocket

Real-time collaborative study platform: rooms with video (LiveKit), server-authoritative synchronized Pomodoro on Redis, and notes exchange with peer reviews.

► **Chaos Crew — Cooperative 2D game in C++ (team)** *[Delivered]*

github.com/eap59-ua/chaos-crew-dca

C++ · Raylib · ECS (EnTT) · CMake · GitHub Actions (CI/CD)

Cooperative 2D game built as a team in modern C++. Entity-Component-System architecture (EnTT), rendering and input handling with Raylib, cross-platform build with CMake and continuous integration via GitHub Actions.

Technical Skills

Backend: ★ Python · ★ FastAPI · Node.js · Java · PHP · Laravel

Frontend: ★ React · ★ TypeScript · JavaScript · HTML5 · CSS3 · Tailwind

Databases: ★ PostgreSQL + PostGIS · MySQL · async SQLAlchemy

DevOps & Tools: ★ Docker · Git · Linux · GitHub Actions · Pytest · Jest · Playwright

Industrial & Others: C++ (Raylib · ECS/EnTT · CMake) · LabVIEW · Machine vision · Android (Kotlin/Java) · scikit-learn · Kafka · Hexagonal architecture
